with optional security elements

- Attack Resistance Grade 2
- Meets the requirements of VdS
 - for anti-drilling protection
 - for anti-drilling and anti-pulling protection

Upgrade compatibility with

Legic®/elolegic

The integration of an electronic Kaba system into the mechanical Kaba expert system is possible at any time.

The Kaba expert key can be simply upgraded by exchanging the standard key clip for a Legic®/elolegic key clip. The key can now be used for any Kaba elolegic reading device and for mechanical cylinders.

Kaba elolegic cylinders provide combined mechanical and electronic identification in a single unique medium.

Kaba expert with optional armoured bow.
Customer coinage available.
